DETAILED ACTION

This office is in response to remarks filed on November 13, 2010. Claims 8-26 are pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 13, 2010 has been entered.

Drawings

The drawings submitted on September 1, 2006 are acceptable.

Allowable Subject Matter

Claims 8- 26 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicants arguments submitted were found persuasive and previous rejection has been withdrawn. The above mentioned claims are allowable over prior arts because the CPA (Cited Prior Arts) of record fails to teach or render obvious the claimed limitations in combination with

Art Unit: 2431

the specific added limitations, as recited in independent Claims and subsequent dependent claims.

The instant application directed to a communicating data system, such as audio or video data, over plural channels that involve selecting data and encryption information, and encrypting the data with the encryption information. The encryption information is broken into portions. The encrypted data is communicated by way of at least one of the plural channels, and at least some portions of the encryption information are communicated over at least one channel *other than* that one over which the encrypted data is communicated.

Thus, the CPA does not explicitly teach or suggest teaches and describes a method for communicating a program signal, comprising the steps of: encrypting the program signal using encryption information to produce an encrypted program signal; dividing the encryption information into a plurality of encryption information portions; communicating the encrypted program signal via a first communications channel the encrypted program signal being transmitted via first transport packets, each first transport packet having a first identifier associated with the program signal; and communicating the plurality of encryption information portions via a second communications channel that is independent of the first communications channel, the encryption information portion being transmitted via second transport packets, each second transport packet having a second identifier associated with the encryption information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2431

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
